Field Descriptions

The following lists the fields available in Esploro Research Assets Usage.

Esploro Research Assets Usage Field Descriptions

Note

Most of the fields of the Esploro Research Assets Usage subject area are described on the [Esploro Research Assets](#) page. The following fields are unique to the Esploro Research Assets Usage subject area.

Asset Usage Measures

Asset Usage Measures is a fact table that stores measures relating to asset usage.

Asset Usage Measures

Field	Description	Additional Information
Asset Level		
Number of Record Views	The number of views of the asset's metadata page in the Research Portal.	This field is COUNTER compliant.
Number of File Views / Downloads	The number of file views and file downloads of the asset in general.	This measure counts the number of file views or downloads done for all files on an asset, but they are counted as a single file view/download per session. Therefore, if several files are accessed on an asset in one session, they are counted as a single file view on the asset level. This field is COUNTER compliant.
Number of Asset Access Denied	The number of access denied requests	
Asset File Level		
Number of Specific File Views / Downloads	The number of file views and file downloads of a specific file.	If a file was viewed and downloaded at the same session, only a single file view is counted.
Last Date of Access	The last date of access	

Usage Date

Usage Date is a dimension table that stores fields relating to the date of usage.

Usage Date

Field	Description	Additional Information
Usage Date	Stores the deposit date in the date format 2/29/2012	
Usage Month Key	Stores the month of the date in number format such as 2 for February	This field is useful when you want to sort by month
Usage Month	Stores the month of the date in month description format such as February	
Usage Full Month	Stores the month and the year of the date in a display format such as Feb 12	
Usage Quarter	Stores the quarter of the date in a display format such as Q1	
Usage Year	Stores the year of the date in string format such as 2012	
Usage Year-	Stores the year and the month in a format such as 2023-1	

Field	Description	Additional Information
Month
