Esploro Research Assets

Note

This subject area is available only for Esploro customers.

You can use the fields in the Esploro Research Assets subject area to create reports that describe your institution's assets in Esploro. The tables below list the available fields.

Esploro Research Assets – Star Diagram

Field Descriptions

The following lists the fields available in Esploro Research Assets.

- ◢ 🔲 Esploro Research Assets
  - ▶ 📁 Research Assets Measures
  - ▶ 📁 Asset Details
  - ▶ 📁 Asset Identifiers
  - ▶ 📁 Asset Descriptions
  - ▶ 📁 Asset Creators and Contributors
  - ▶ 📁 Asset Collections
  - ▶ 📁 Asset Academic Organization Units
  - ▶ 📁 Asset Creation Date
  - ▶ 📁 Asset Modification Date
  - ▶ 📁 Asset Dates
  - ▶ 📁 Asset Access Rights
  - ▶ 📁 Asset License
  - ▶ 📁 Asset Conference/Event
  - ▶ 📁 Asset Grants and Funders
  - ▶ 📁 Asset Citations Count
  - ▶ 📁 Asset Attachments
  - ▶ 📁 Asset Relations
  - ▶ 📁 Asset Patent
  - ▶ 📁 Asset ETD Details
  - ▶ 📁 Asset Local Fields
  - ▶ 📁 Asset Spatial Details
  - ▶ 📁 Asset ANZ Codes
  - ▶ 📁 Asset National Assessment Fields
  - ▶ 📁 Asset Teaching and Learning
  - ▶ 📁 Asset Notes
  - ▶ 📁 Asset Usage
  - ▶ 📁 Asset Topics
  - ▶ 📁 ISSN and ISBN
  - ▶ 📁 ---------------------------
  - ▶ 📁 File Details
  - ▶ 📁 File Level Access Rights
  - ▶ 📁 File Level License
  - ▶ 📁 File Temporary Links
  - ▶ 📁 ---------------------------
  - ▶ 📁 Link Details
  - ▶ 📁 Link Level License
  - ▶ 📁 ---------------------------
  - ▶ 📁 Deposit Details
  - ▶ 📁 Deposit Acceptance Policy

Note

Date fields can consist of a partial date, such as just the year or a month and year. Calendar Date fields always consist of a month, date, and year. If the information is not provided, `01` is added, so that a date of 2020 is rendered `01/01/ 2020`. This date format is useful when filtering the report by date.

Esploro Asset Measures

Esploro Asset Measures is a fact table that displays measures relating to assets.

Esploro Research Assets

Field	Description	Additional Information
Number of Assets	The number of assets	
Number of Assets with Files	The number of assets with files	
Number of Assets with Links	The number of assets with links	
Number of Assets with Relations	The number of assets with relations	
Number of Deposits	The number of deposits	
Number of Deposits (Active)	The number of active deposits	
umber of Researcher Draft Deposits	The number of draft deposits	
Number of Smart Harvests	The number of smart harvests	
Number of Smart Harvests (Approved)	The number of approved smart harvests	

Asset Details

Asset Details is a dimension table that displays details about assets.

Asset Details

Field	Description	Additional Information
Asset Category	The asset category	
Asset Type	The asset type	
Asset Subtype	The asset subtype This is mainly for data sets, to describe what type.	
Asset Input Method	The asset input method	

Field	Description	Additional Information
Asset Created By	The user who created the asset	
Asset Modified By	The user who modified the asset	
Asset Input Status	The asset's status (for example: approved or draft)	
Audience	The audience of the asset	
Bibliography	Indicates if the asset has a bibliography	
Display in Portal	Indicates if the asset is displayed in the Research Portal	
Display in Profile	Indicates if the asset is displayed in the Researcher Profile	
Duration	The duration of the asset	
Edition	The edition of the asset	For example, book edition.
Handle Identifier Status	The handle identifier status of the asset	Possible values: registered / not registered
Is Deposit	Indicates if the asset was manually deposited by a researcher or staff member	
Journal Title	The title of the journal	
Keywords	The keywords of the asset	
Languages	The languages of the asset	
Open Access Indicator	Indicates if the asset is open access	
Open Access Status	The open-access status of the publication.	Possible values are: • Green • Hybrid • Gold • Bronze • Closed • Unknown For more information, see Article Information Section.
Pages	The pages of the asset	
Peer Reviewed	Indicates if the asset was peer reviewed	
Provenance	The origin of the asset, where the record came from	
Publication Details	The publication details of the asset	

Field	Description	Additional Information
Publisher	The publisher of the asset	
Research Topics	The research topics of the asset	
Title	The title of the asset	
Asset Organizations List	A list of the asset organizations	
Asset Authors List	A list of the asset authors	
Asset Authors List with Primary Identifier	A list of the asset authors with their primary identifier	
Has Attachment	Indicates if the asset has an attachment	
Has Files	Indicates if the asset has files	
Has Inventory	Indicates if the asset has inventory	
Has Links	Indicates if the asset has links	
Has Relations	Indicates if the asset has relationships with other assets	
Volume	The volume number of the asset	
Issue	The issue number of the asset	
End Page	The end page of the asset	
Start Page	The start page of the asset	
Article Number	The article number of the asset	
Sub Title	The subtitle of the asset	
Publication Place	The publication place of the asset	
Format	The format of the asset	
Size	The size of the asset	
Translated Title	The translated title of the asset	
Alternative Title	The alternative title of the asset	
Publication Title	The publication title of the asset	
NLM Abbreviation	The NLM abbreviation of the asset	
Series	The series of the asset	
Series Number	The series number of the asset	
Comment	Comments of the asset	

Field	Description	Additional Information
Copyright Statement	The copyright statement of the asset	
Illustrations	The illustrations of the asset	
Unpaginated Pages	The unpaginated pages of the asset	

Asset Identifiers

Asset Identifiers is a dimension table that displays details about asset identifiers.

Asset Identifiers

Field	Description	Additional Information
Asset ID	The ID of the asset	
ARK ID	The ARK ID of the asset	
arXiv ID	The arXiv ID of the asset	
DOI	The DOI of the asset	
DOI Status	The status of the DOI	Possible values: • Warning • Failed Migration • Migration • Success Migrated • Failed • Success • Reserved
Government Document Number	The government document number of the asset	
ISBN List	The ISBN of the asset in a concatenated list	
ISMN	The ISMN of the asset	
ISSN List	The ISSN of the asset in a concatenated list	
Publication DOI	The Publication DOI of the asset	
PMID	The PMID of the asset	
PMCID	The PMCID of the asset	
Originating System ID	The originating system ID of the asset	
Handle Identifier	The handle identifier of the asset	
Report Number	The report number of the asset	

Field	Description	Additional Information
SICI	The SICI of the asset	
WOS ID	The WOS ID of the asset	
Scopus ID	The Scopus ID of the asset	
Additional Identifier 1-9	Additional Identifiers of the asset 1-9	

Asset Descriptions

Asset Descriptions is a dimension table that displays details about asset descriptions.

Asset Descriptions

Field	Description	Additional Information
Has Abstract	Indicates if the asset has an abstract	
Has Audience	Indicates if the asset has an audience description	
Has Coverage	Indicates if the asset has coverage metadata	
Has Education Level	Indicates if the asset has an educational level description	
Has Instructional Method	Indicates if the asset has an instructional method description	
Has Methods	Indicates if the asset has method metadata	
Has Other Description	Indicates if the asset has other descriptions	
Has Spacial Information	Indicates if the asset has spatial information	
Has Technical Information	Indicates if the asset has technical information	

Asset Creators and Contributors

Asset Creators and Contributors is a dimension table that displays details about asset authors.

Asset Authors

Field	Description	Additional Information
Author Affiliated/Non-Affiliated	The data indicating if the author is affiliated or not affiliated	
Author Affiliation #1-5 (in Asset)	The author affiliations while creating or contributing to the asset, recorded in the asset	
Author Affiliation Country #1-5 (in Asset)	The author affiliation country of the author affiliations of an asset of the corresponding **Author Affiliation (in**	

Field	Description	Additional Information
	Asset) #1-5 field	
Author First Name	The first name of the author of the asset	
Author Last Name	The last name of the author of the asset	
Author Middle Name	The middle name of the author of the asset	
Author Name	The name of the author of the asset	
Author Name Suffix	The suffix of the name of the author of the asset	
Author Order (in Asset)	The order of the author as listed in the asset	
Author Role	The author role when creating or contributing to the asset	
Author Type	The author type: creator or contributor	
Author Current External Org Affiliations List	The author's current external organization affiliations list	
Author Current External Organization Affiliations Country	This field is for future use	
Author Current Internal Org Affiliations List	The author's current internal organization affiliations list	If an affiliated researcher has no current internal affiliation defined, Esploro Analytics uses the researcher's institution for this field
Author Display in Public Profile	Indicates if the asset should appear in the creator's public profile	
Author Group Author	The group author or organization name that created or contributed to the asset	
Author Is Owner	Indicates if the creator or contributor of the asset is the owner of the asset	
Author Match Status	The author matching status of the creator or contributor of the asset	
Author Previously Affiliated	Indicates if the researcher was previously affiliated with the institution	
Author Researcher Non-Affiliated Primary Identifier	The primary identifier of non-affiliated researchers	
Author Researcher Preferred First Name	The researcher preferred first name of the creator or contributor	

Field	Description	Additional Information
Author Researcher Preferred Last Name	The preferred last name of the researcher	
Author Researcher Preferred Middle Name	The preferred middle name of the researcher	
Author Researcher Preferred Name	The preferred name of the researcher	
Author Researcher Preferred Name Suffix	The preferred name suffix of the researcher	
Author Affiliated Primary Identifier	The primary identifier of the affiliated researcher	

Asset Collections

Asset Collections is a dimension table that displays details about asset collections.

Asset Collections

Field	Description	Additional Information
Collection Code	The code of the collection	
Collection Title	The name of the collection	
Collection Status	Indicates if the collection is active or not	

Asset Academic Organization Units

Asset Academic Organization Units is a dimension table that displays details about research organization units.

Asset Academic Organization Units

Field	Description	Additional Information
Organization Unit Code	The code of the organization unit with which the asset is associated	
Organization Unit Name	The name of the organization unit with which the asset is associated	
Organization Acronym	The acronym of the organization	
Organization Unit Status	The status of the organization unit with which the asset is associated	

Field	Description	Additional Information
Organization Unit Type	The type of the organization unit	
Organization Parent Unit Code	The parent organization unit code	
Organization Parent Unit Name	The parent organization unit name	
Ror Identifier	The organization's ROR (Research Organization Registry) identifier	
Grid Identifier	The organization's GRID identifier. GRID has been deprecated and continued by ROR	
Fundref Identifier	The organization's FundRef Identifier	
Other Identifier	Any additional identifiers	
Organization Contact Name	Name of a contact person/point for the organization	
Phone	Phone of contact person/point	
Email	Email of contact person/point	
Full Location	The complete address of the organization	
Has Homepage	Indicates if the organization has a homepage	
Display in Portal	Indicates if the organization unit displays in the Organization Tree in the portal but only if the unit has assets/public researcher profiles	
Always Display	Indicates if the organization unit always displays in the Organization Tree in the portal – even if it does not have assets/profiles	
Has Files	Indicates if the organization unit has associated files	

Asset Creation Date

Asset Creation Date is a dimension table that displays details about asset creation dates.

Asset Creation Date

Field	Description	Additional Information
Asset Creation Date	Displays the date that the asset was created in Esploro in the date format 2/29/2012	For the date that the asset was created in its original source, use Asset Dates > Asset Created Date
Asset Creation Month Key	Displays the month of the date in number format such as 2 for February	This field is useful when you want to sort by month
Asset Creation Month	Displays the month of the date in month description format such as February	

Field	Description	Additional Information
Asset Creation Full Month	Displays the month and the year of the date in a display format such as Feb 12	
Asset Creation Quarter	Displays the quarter of the date in a display format such as Q1	
Asset Creation Year	Displays the year of the date in string format such as 2012	
Asset Creation Year-Month	Displays the year and the month in a format such as 2023-1	

Asset Modification Date

Asset Modification Date is a dimension table that displays details about asset modification dates.

Asset Modification Date

Field	Description	Additional Information
Asset Modification Date	Displays the asset modification date in the date format 2/29/2012	
Asset Modification Month Key	Displays the month of the date in number format such as 2 for February	This field is useful when you want to sort by month
Asset Modification Month	Displays the month of the date in month description format such as February	
Asset Modification Full Month	Displays the month and the year of the date in a display format such as Feb 12	
Asset Modification Quarter	Displays the quarter of the date in a display format such as Q1	
Asset Modification Year	Displays the year of the date in string format such as 2012	
Asset Modification Year-Month	Displays the year and the month in a format such as 2023-1	

Asset Dates

Asset Dates is a dimension table that displays details about asset dates.

Asset Dates

Field	Description	Additional Information
Asset Accepted Date	The date on which the asset was accepted	The date as a string and can be partial, such as just the year or just the year and month
Asset	The date on which the asset was accepted	The date in format 01/01/2007 that can be used for

Field	Description	Additional Information
Accepted Date (Calendar)		filtering by date in the report. If the month or day are missing, `01` is used
Asset Accepted Year	The year in which the asset was accepted	
Asset Application Date	The application date for the patent of the asset	
Asset Application Year	The application year for the patent of the asset	
Asset Approval Date	The date on which the asset was approved	
Asset Approval Year	The year in which the asset was approved	
Asset Available Date	The date on which the asset was made available	The date as a string and can be partial, such as just the year or just the year and month
Asset Available Date (Calendar)	The date on which the asset was made available	The date in format 01/01/2007 that can be used for filtering by date in the report. If the month or day are missing, `01` is used
Asset Available Year	The year in which the asset was made available	
Asset Collected Date	The date on which the asset was collected	
Asset Collected Year	The year in which the asset was collected	
Asset Copyrighted Date	The copyright date of the asset	
Asset Copyrighted Year	The copyright year of the asset	
Asset Created Date	The date on which the asset was created in its original source.	For the date that the asset was created in Esploro, use Asset Creation Date > Asset Creation Date

Field	Description	Additional Information
Asset Created Year	The year in which the asset was created	
Asset Defense Date	The date the asset was defended	
Asset Defense Year	The year the asset was defended	
Asset Degree Date	The date of the degree of the asset	The date as a string and can be partial, such as just the year or just the year and month
Asset Degree Date (Calendar)	The date of the degree of the asset	The date in format 01/01/2007 that can be used for filtering by date in the report. If the month or day are missing, 01 is used
Asset Degree Season	The season of the asset degree	
Asset Degree Season Code	The season code of the asset degree	
Asset Degree Year	The year of the asset degree	
Asset Epublished Date	The date on which the asset was epublished	The date as a string and can be partial, such as just the year or just the year and month
Asset Epublished Date (Calendar)	The date on which the asset was epublished	The date in format 01/01/2007 that can be used for filtering by date in the report. If the month or day are missing, 01 is used
Asset Epublished Year	The year in which the asset was epublished	
Asset Hierarchal Date (Year)	One of the dates of an asset (year only), selected according to the hierarchy or ranking of dates as listed under Date Hierarchy. The first field with a value is displayed.	
Asset Issued Date	The date on which the asset was issued	
Asset Issued Year	The year in which the asset was issued	
Asset Opening	The date on which the asset was opened	

Field	Description	Additional Information
Date		
Asset Opening Year	The year in which the asset was opened	
Asset Performance Date	The performance date of the asset	
Asset Performance Year	The performance year of the asset	
Asset Posted Date	The date on which the asset was posted	
Asset Posted Year	The year in which the asset was posted	
Asset Presented Date	The date on which the asset was presented	
Asset Presented Year	The year the asset was presented	
Asset Published Date	The date on which the asset was published	The date as a string and can be partial, such as just the year or just the year and month
Asset Published Date (Calendar)	The date on which the asset was published	The date in format 01/01/2007 that can be used for filtering by date in the report. If the month or day are missing, 01 is used
Asset Published Season	The season in which the asset was published	
Asset Published Season Code	The code of the season in which the asset was published	
Asset Published Year	The year the asset was published	
Asset Renewed Date	The date on which the asset was renewed	
Asset Renewed	The year the asset was renewed	

Field	Description	Additional Information
Year		
Asset Submitted Date	The date the asset was submitted	
Asset Submitted Year	The year the asset was submitted	
Asset Updated Date	The date on which the asset was updated	
Asset Updated Year	The year in which the asset was updated	
Asset Valid Date	The valid date of the asset	
Asset Valid Year	The valid year of the asset	

Asset Access Rights

Asset Access Rights is a dimension table that displays details about asset access rights.

Asset Access Rights

Field	Description	Additional Information
Asset Policy Name	The name of the access right policy associated with the asset	
Asset Policy Description	The description of the access right policy associated with the asset	
Asset Policy Creation Date	The creation date of the access right policy associated with the asset	
Asset Policy Created By	The user who created the access right policy associated with the asset	
Asset Policy Modification Date	The date the access right policy associated with the asset was modified	
Asset Policy Modified By	The user who modified the access right policy associated with the asset	
Asset Policy Denied Note	The denied note of the access right policy associated with the asset	
Asset Embargo Expiry Date	The date the embargo on the asset expires	

Asset License

Asset License is a dimension table that displays details about asset licenses.

Asset License

Field	Description	Additional Information
Asset License Name	The name of the license associated with the asset	
Asset License Code	The code of the license associated with the asset	
Asset License Description	The description of the license associated with the asset	
Asset License URL	The URL of the license associated with the asset	
Display in Researcher Profile	Indicates if the asset license is displayed in Researcher Profile	

Asset Conference/Event

Asset Conference/Event is a dimension table that displays details about conferences and events with which the asset is associated.

Asset Conference/Event

Field	Description	Additional Information
Conference/Event Date	The conference or event date	
Conference/Event Location	The conference or event location	
Conference/Event Name	The conference or event name	
Conference/Event Number	The conference or event number	
Event Type	The type of event	

Asset Grants and Funders

Asset Grants is a dimension table that displays details about asset grants.

Asset Grants

Field	Description	Additional Information
Grant Acronym	The acronym of the grant	
Grant ID	The ID of the Grant	
Grant Name	The name of the grant	

Field	Description	Additional Information
Grant Status	The status of the grant	
Grant Category	The category of the grant	
Grant Amount	The amount of the grant	
Grant Funder	The funder of the grant	
Grant Funder Country	The country of the funder of the grant	
Grant Funder Parent	The name of the funder's parent organization	
Grant Start Date	The start date of the grant	
Grant End Date	The end date of the grant	
Grant Expected End Date	The expected end date of the grant	
Grant Expected Start Date	The expected start date of the grant	
Grant Note	The Grant Note	
Grants URL	The URL of the grant	

Asset Citations Count

Asset Citations Count is a dimension table that displays details about the number of asset citations per source.

Asset Citations Count

Field	Description	Additional Information
Citations Count Source	The source of the citation count	Possible values: Web of Science, Scopus, Other
Total Citation Count	The total citation count for the relevant source	
Year Of Citations Count	The year for which there is a count for the relevant source	
Yearly Citations Count	The citation count for the relevant year	

Asset Attachments

Asset Attachments is a dimension table that displays details about asset attachments.

Asset Attachments

Field	Description	Additional Information
Attachment Creation Date	The date the attachment was created	
Attachment Creator	The creator of the attachment	

Field	Description	Additional Information
Attachment Description	The description of the attachment	
Attachment Name	The name of the attachment	
Attachment Modification Date	The date the attachment was modified	
Attachment Modified By	The user who modified the attachment	
Attachment Notes	The notes of the attachment	
Attachment URL	The URL of the attachment	
Attachment Extension	The file extension of the attachment	
Attachment Size (In MB)	The size of the attachment in MB	

Asset Relations

Asset Relations is a dimension table that displays details about asset relations. This dimension enables you to create reports to answer questions such as: How many articles do I have that are associated with a dataset? How many datasets are missing relations?

Asset Relations

Field	Description	Additional Information
Related Asset Category	The category of the related asset	
Related Asset Type	The type of the related asset	
Related Asset DOI	The DOI of the related asset	
Related Asset Title	The title of the related asset	
Related Asset Id	The ID of the related asset	
External Relation URL	The external relation URL	
Relation Category	The category of the relation	
Relation Type	The relation type	
Relation Create Date	The creation date of the relation	

Asset Patent

Asset Patent is a dimension table that displays details that are specific to the patents of the assets.

Asset Relations

Field	Description	Additional Information
Patent Status	The status of the patent	
Patent Number	The patent's number	
Patent Number Abbreviation	The abbreviation number for the patent	
Patent Kind Code	The kind of patent code	
Patent Application Code	The patent application code	
Patent Application Number	The patent application number	
Patent Agency	The agency that issued the patent	
Government Documents Number	The number of the government document for the patent	

Asset ANZ Codes

Asset ANZSRC Codes is a dimension table that displays details related to the Australian and New Zealand Standard Research Classification codes.

Asset ANZSRC Codes

Field	Description	Additional Information
Fields of Research Full Code	The code of the field of research	
Socio-Economic Full Code	The socio-economic objective code	
Socio-Economic Description (Full Code)	The socio-economic objective description	
Socio-Economic Percentage (Full Code)	The percentage of the socio-economic objective	
Fields of Research Description (Full Code)	The description of the field of research	
Fields of Research Percentage (Full Code)	The percentage of the field of research	
Type of Activity	The type of activity	
Fields of Research Code - Level 1-3	The level of the field of research code	
Fields of Research Description - Level 1-3	The level of the field of research description	
Fields of Research Version	The version of the field of research	
Socio-Economic Code - Level 1-3	The level of the socio-economic objective code	
Socio-Economic Description- Level 1-3	The level of the socio-economic objective description	
Socio-Economic Version	The socio-economic version	

Asset Local Fields

Asset Local Fields is a dimension table that displays details related to the local fields of the asset.

Asset Local Fields

Field	Description	Additional Information
Local Field 01-15	The local fields of the asset	For each local field, the label that you configure appears for the field name. For more information, see Configuring Local Asset Fields.

Asset Spatial Details

Asset Spatial Details is a dimension table that displays details related to the spatial location of the asset.

Asset Spatial Details

Field	Description	Additional Information
Spatial Address	The spatial address	
Spatial Box	The spatial box	
Spatial Point	The spatial point	

Asset ETD Details

Asset ETD Details is a dimension table that displays details related to electronic thesis dissertation details.

Asset ETD Details

Field	Description	Additional Information
Awarding Academic Unit 1-5	The awarding academic unit	
Degree Awarded	The degree awarded	
ETD Author Degree Grantor	The ETD author degree grantor	
Primary Thesis Topic	The primary thesis topic	
Degree In	What the degree is in	
Secondary Thesis Topic	The secondary thesis topic	
ETD Author Email	The ETD author email	
Project Type	The project type	

Asset National Assessment Fields

Asset National Assessment Fields is a dimension table that displays details related to national assessment fields, used for

assessment reporting.

Asset National Assessment Fields

Field	Description	Additional Information
Profile Code	The assessments profile code	
Profile Description	The assessments profile description	
Profile Name	The assessments profile name	
Profile Status	The assessments profile status	
Asset National Assessment Fields Name	The assessments profile field name	
National Assessment Field Value 01-50	The assessments profile field value	

Asset Teaching and Learning

Asset Teaching and Learning is a dimension table that displays details related to assets used for teaching and learning.

Asset Teaching and Learning

Field	Description	Additional Information
Mobile Compatibility	Indicates if the asset is mobile compatible	
Source code availability	Indicates if the asset source code is available	
Typical learning time	The typical learning time expected for the teaching material's audience	
Course name	The course name to which the asset relates	
Course number	The course number to which the asset relates	

Asset Notes

Asset Notes is a dimension table that displays details related to asset notes.

Asset Notes

Field	Description	Additional Information
Note Created By	The creator of the note	
Note Creation Date	The date the note was created	
Note Text	The text of the note	
Note Type	The type of the note	
Note Update Date	The date the note was updated	

Field	Description	Additional Information
Note Updated By	The user who updated the note	
Note URL	The URL of the note	

Asset Topics

Asset Topics is a dimension table that displays details related to asset topics.

Asset Topics

Field	Description	Additional Information
Asset Topic Language	The language of the topic	
Asset Topic Type	The type of the topic	Possible Values: • Abstract • Keyword • Subject
Asset Topic Value	The value of the topic	

Asset Usage

Asset Usage is a dimension table that displays fields that display the usage of the assets.

Asset Usage

Field	Description	Additional Information
Number of File Views / Downloads	The number of file views and file downloads of the asset in general.	This measure counts the number of file views or downloads done for all files on an asset, but they are counted as a single file view/download per session. Therefore, if several files are accessed on an asset in one session, they are counted as a single file view on the asset level. This field is COUNTER compliant.
Number of Record Views	The number of views of the asset's metadata page in the Research Portal.	This field is COUNTER compliant.

ISSN and ISSBN

ISSN and ISSBN is a dimension table that displays fields that display the ISSNs and ISSBNs of an asset on separate lines.

Field	Description	Additional Information
ISBN single (Normalized)	The ISBNs of the asset. Each ISBN is on a separate line.	This field is updated monthly.
ISSN single (Normalized)	The ISSNs of the asset. Each ISSN is on a separate line.	This field is updated monthly

InCites Metrics Details

InCites is a citation-based evaluation tool by Clarivate for analyzing institutional productivity and benchmark output. For more information see InCites Benchmarking & Analytics.

Note

- The InCites data is available for InCites customers only. You must fill out the Web of Science Identifier for assets or run the Web of science ID job to see data for these fields. For additional help, contact Ex Libris Support.
- The data displayed in the CNCI Average, JNCI, Normalized Impact, and Journal Expected Citations fields is related to the schema that is selected. Therefore, there may be differences between what is displayed in analytics and what is displayed in the InCites tool.

InCites Metrics Details is a dimension table that displays details about InCites metrics.

InCites Metrics Details

Field	Description	Additional Information
CNCI (InCites)	The Category Normalized Citation Impact (CNCI) of a document is calculated by dividing the actual count of citing items by the expected citation rate for documents with the same document type, year of publication, and subject area. An CNCI value of 1 represents performance at par with world average, values above 1 are considered above average, and values below 1 are considered below average. When a document is assigned to more than one subject area, an average of the ratios of the actual to expected citations is used.	
ESI Highly Cited Paper (InCites)	Highly cited papers are the top one percent in each of the 22 ESI subject areas per year. They are based on the most recent 10 years of publications.	Possible Values: Yes/No
ESI Hot Paper (InCites)	Hot Papers are calculated based on citations per field and age. The number of hot papers for an entity (author, institution, country, and journal) divided by the total number of documents produced by the given research entity times 100.	Possible Values: Yes/No
Journal Impact Factor (JIF) (InCites)	The Journal Impact Factor is the average number of times that that articles published over the course of a year in a journal have been cited. The impact factor is calculated by dividing the number of citations per year by the total number of articles published in the previous two years. An Impact Factor of 1.0 means that, on average, the articles published one or two year ago have been cited one time.	
InCites Record Type (InCites)	InCites supports one document type per publication. Record types can be: Article, Review, Proceedings Paper, and Book.	
Is InCites (InCites)	An indication if a record has InCites information.	Possible Values:

Field	Description	Additional Information
		Yes/No
Is Industry Collaboration (InCites)	Papers that contain two or more organizations with at least one organization listing its organization type as *corporate* or *global corporate*.	Possible Values: Yes/No
Is Domestic Collaboration (InCites)	Papers with two or more authors and two or more distinct addresses, with all organizations and addresses in the same country.	Possible Values: Yes/No
Is International Collaboration (InCites)	Papers that contain one or more international co-authors.	Possible Values: Yes/No
JNCI (InCites)	The Journal Normalized Citation Impact of a single publication is the ratio of the actual number of citing items to the average citation rate of publications in the same journal in the same year and with the same document type. The JNCI for a set of publications is the average of the JNCI for each publication.	
Journal Expected Citations (InCites)	The average number of citations of articles of the same document type from the same journal in the same database year. You can compare an article's citation count to this norm by forming a ratio of actual citations to expected citations--the Journal Actual/Expected Citations ratio.	
Modification Date (InCites)	The modification date of the citation data.	
Category Expected Citations (InCites)	The expected number of citations calculated from other items of the same type (article, review, etc.) published in the same subject categories and year.	
Open Access (InCites)	Indicates if the record considered open access.	Possible Values: Yes/No
Open Access Type (InCites)	Notification of the type of open access of the Web of Science record - Gold or Bronze (free content at a publisher's website) and Green (author self-archived in a repository) OA versions.	

For more information on the InCites metrics, see Indicators Handbook.

Note

Yes/No fields display **No** for records that do not have a Web of Science Identifier and do not have additional InCites data available.

InCites Metrics Measures

InCites is a citation-based evaluation tool by Clarivate for analyzing institutional productivity and benchmark output. For more information see InCites Benchmarking & Analytics.

InCites Metrics Measures is a dimension table that displays details about InCites metrics measures.

InCites Metrics Measures

Field	Description	Additional Information
Number of ESI Highly Cited Papers (InCites)	A count of Highly Cited Papers	
Number of ESI Hot Papers (InCites)	A count of Hot Papers	
Number of Industry Collaborations (InCites)	A count of records marked as industry collaborations	
Number of Domestic Collaborations (InCites)	A count of records marked as domestic collaborations	
Number of International Collaborations (InCites)	A count of records marked as international collaborations	

For more information on the InCites metrics, see Indicators Handbook.

Note

Yes/No fields display **No** for records that do not have a Web of Science Identifier and do not have additional InCites data available.

InCites Metrics Schema Details

InCites is a citation-based evaluation tool by Clarivate for analyzing institutional productivity and benchmark output. For more information see InCites Benchmarking & Analytics.

InCites Metrics Schema Details is a dimension table that displays details about research area schemas, which are used to place bibliometric data in context. They help to explain performance within the context of research areas, because publication rates and citation behavior can vary considerably from discipline to discipline, between document types, and over time. There are 17 research area schemas available from InCites, including Web of Science research areas, Citation Topics, various national research area lists, and Sustainable Development Goals schema.

InCites Metrics Schema Details

Field	Description	Additional Information
Category Expected Citations (InCites)	The Category Normalized Citation Impact (CNCI) of a document is calculated by dividing the actual count of citing items by the expected citation rate for documents with the same document type, year of publication, and subject area. An CNCI value of 1 represents performance at par with world average, values above 1 are considered above average, and values below 1 are considered below average. When a document is assigned to	

Field	Description	Additional Information
	more than one subject area, an average of the ratios of the actual to expected citations is used. This field is per subject and is not averaged.	
Category Percentile (InCites)	A percentile is a normalized indicator because it indicates how a paper performed relative to others in its field, year, and document type. The percentile of a publication is determined by creating a citation frequency distribution for all publications in the same year, subject category, and document type (arranging the papers in ascending order of citation count), and determining the percentage of papers at each level of citation.	
CNCI (InCites)	The Category Normalized Citation Impact (CNCI) of a document is calculated by dividing the actual count of citing items by the expected citation rate for documents with the same document type, year of publication and subject area. When a document is assigned to more than one subject area an average of the ratios of the actual to expected citations is used. The CNCI of a set of documents, for example the collected works of an individual, institution or country/region, is the average of the CNCI values for all the documents in the set.	
Is Best Term (InCites)	If multiple subjects are related to an output, this field indicates which one has the highest match (one per schema).	
Research Area Schema (InCites)	The schema name.	
Subject Term (InCites)	The subject name.	

For more information on the InCites metrics, see Research Area Schemas.

File Details

File Details is a dimension table that displays details about files.

File Details

Field	Description	Additional Information
File Creation Date	The creation date of the file	
File Creation Date (Calendar)	The creation date of the file	The date in format 01/01/2007 that can be used for filtering by date in the report. If the month or day are missing, `01` is used
File Created By	The user who created the file	
File Description	The description of the file	
File Display Name	The Display Name of the file	This is as opposed to the File Name, which may not be meaningful.
File Extension	The extension of the file	
File ID	The ID of the file	
File Internal Path	The internal path of the file	

Field	Description	Additional Information
File Mime Type	The mime type of the file	
File Modification Date	The modification date of the file	
File Modification Date (Calendar)	The modification date of the file	The date in format 01/01/2007 that can be used for filtering by date in the report. If the month or day are missing, 01 is used
File Modified By	The user who modified the file	
File Name	The name of the file	
File Size (In Bytes)	The size of the file in bytes	This field is a measure field and can be aggregated.
File Size (In MBs)	The size of the file in megabytes	This field is a measure field and can be aggregated.
File Supplemental Indicator	indicates if the file is supplemental or represents the actual asset content	
File Type	The content type of the file	

File Level Access Rights

File Level Access Rights is a dimension table that displays details about file level access rights.

File Level Access Rights

Field	Description	Additional Information
File Policy Name	The name of the file of the access right policy associated with the asset	
File Policy Description	The description of the file of the access right policy associated with the asset	
File Policy Creation Date	The creation date of the file of the access right policy associated with the asset	
File Policy Created By	The user who created the file of the access right policy associated with the asset	
File Policy Modification Date	The modification date of the file of the access right policy associated with the asset	
File Policy Modified By	The user who modified the file of the access right policy associated with the asset	
File Policy Denied Note	The denied note of the file of the access right policy associated with the asset	
File Policy Embargo Expiry Date	The date the embargo on the file expires	

File Level License

File Level License is a dimension table that displays details about file level licenses.

File Level License

Field	Description	Additional Information
File License Name	The name of the file of the license associated with the asset	
File License Code	The code of the file of the license associated with the asset	
File License Description	The description of the file of the license associated with the asset	
File License URL	The URL of the file of the license associated with the asset	
Display in Researcher View	Indicates if the file license is displayed in Researcher View	

File Temporary Links

File Temporary Links is a dimension table that contains fields that help you monitor the temporary file links.

File Temporary Links

Field	Description	Additional Information
Link UUID	The universal unique identifier of the link	
Temporary Link Creation Date	The date the temporary link was created	
Temporary Link Expiration Date	The date the temporary link expired	

Link Details

Link Details is a dimension table that displays details about link details.

Link Details

Field	Description	Additional Information
Link Creation Date	The creation date of the link	
Link Created By	The user who created the link	
Link Modification Date	The last date the link was modified	
Link Modified By	The user who modified the link	
URL	The URL of the link	
Link Type	The content type of the link	
Link Description	The description of the link's content	

Field	Description	Additional Information
Link Order	The order of the link in the asset's links list	
Link Ownership	Whether the link is owned by the institution or not	
Link Supplemental Indicator	Indicates if the link is supplemental or represents the actual asset content	
Link Title	The display title of the link	
Display in Viewer	Indicates if the link's content is displayed in the viewer	
Link Rights	The asset access rights of the link	

Link Level License

Link Level License is a dimension table that displays details about the link level license.

Link Level License

Field	Description	Additional Information
Link License Code	The code of the link license	
Link License Name	The name of the link license	
Link License Description	The description of the link license	
Link License URL	The URL of the link license	
Asset Categories	The asset categories relevant for this license	
Display in Researcher View	Indicates if the link license should appear to the researcher to select when making a deposit	

Deposit Details

Deposit Details is a dimension table that displays details about deposits.

Deposit Details

Field	Description	Additional Information
Deposit Status	The status of the deposit	
Owner ID	The ID of the owner of the deposit	
Owner First Name	The first name of the owner of the deposit	
Owner Middle Name	The middle name of the owner of the deposit	
Owner Last Name	The last name of the owner of the deposit	

Field	Description	Additional Information
Assigned to ID	The ID of the user assigned to the deposit	
Assigned to Name	The name of the user assigned to the deposit	

Deposit Acceptance Policy

Deposit Acceptance Policy is a dimension table that displays details about the deposit acceptance policy.

Deposit Acceptance Policy

Field	Description	Additional Information
Is Policy Accepted	Indicates if the Policy is Accepted	
Policy Name	The name of the policy	
Acceptance Note	The policy acceptance note	
Policy Acceptance Date	The policy acceptance date	

Deposit Approval Date

Deposit Approval Date is a dimension table that displays details about the deposit approval date.

Deposit Approval Date

Field	Description	Additional Information
Deposit Approval Date	Displays the date that the deposit was approved in the date format 2/29/2012	
Deposit Approval Full Month	Displays the month and the year of the date in a display format such as Feb 12	
Deposit Approval Month	Displays the month of the date in month description format such as February	
Deposit Approval Month Key	Displays the month of the date in number format such as 2 for February	This field is useful when you want to sort by month
Deposit Approval Quarter	Displays the quarter of the date in a display format such as Q1	
Deposit Approval Year	Displays the year of the date in string format such as 2012	
Deposit Approval Year-Month	Displays the year and the month in a format such as 2023-1	

Deposit Creation Date

Deposit Creation Date is a dimension table that displays details about deposit creation dates.

Deposit Creation Date

Field	Description	Additional Information
Deposit Creation Date	Displays the deposit date in the date format 2/29/2012	
Deposit Creation Month Key	Displays the month of the date in number format such as 2 for February	This field is useful when you want to sort by month
Deposit Creation Month	Displays the month of the date in month description format such as February	
Deposit Creation Full Month	Displays the month and the year of the date in a display format such as Feb 12	
Deposit Creation Quarter	Displays the quarter of the date in a display format such as Q1	
Deposit Creation Year	Displays the year of the date in string format such as 2012	
Deposit Creation Year-Month	Displays the year and the month in a format such as 2023-1	

Deposit Modification Date

Deposit Modification Date is a dimension table that displays details about deposit modification dates.

Deposit Modification Date

Field	Description	Additional Information
Deposit Modification Date	Displays the deposit modification date in the date format 2/29/2012	
Deposit Modification Month Key	Displays the month of the date in number format such as 2 for February	This field is useful when you want to sort by month
Deposit Modification Month	Displays the month of the date in month description format such as February	
Deposit Modification Full Month	Displays the month and the year of the date in a display format such as Feb 12	
Deposit Modification Quarter	Displays the quarter of the date in a display format such as Q1	
Deposit Modification Year	Displays the year of the date in string format such as 2012	
Deposit Modification Year-Month	Displays the year and the month in a format such as 2023-1	

Institution

The shared Institution dimension is available in every subject area. It contains the following fields:

Institution

Field	Description	Additional information
Institution Code	The code of the institution.	
Institution Name	The name of the institution.	
Institution Timezone	The timezone of the institution	
Esploro Institution Code	The code of the Esploro institution	
Esploro Institution Name	The name of the Esploro institution	
Data Available As Of	When the data became available to analytics	
Data Updated As Of	When the data was taken from Esploro
